Weekly Update

Wow, how is it the middle of June already!? Mother Nature sure loves throwing us curveballs this year. It's been a very mild Spring with temperatures staying in the upper 60's to mid 70's. We've had more rain than recent years which is great for the parks and golf course. On one hand the golf course has been staying very busy, while the boat launch has been pretty quiet.

We have our first Night of Golf of the season this coming Saturday. All spots are booked, so for those of you who got a spot reserved we'll look forward to seeing you Saturday night. Otherwise, we will have another Night Golf in July.

Stayed tuned for a lot of events happening next week. Reminder to stay up to date with events, check our calendar tab on the website.

Golfers,

Superintendent's Corner

Mosquitos are in full force at all of Crescent Bar right now, especially toward the end of the island, so be prepared with long sleeves and bug spray. This month of June has had several anomalies compared to years past. For example, in the year 2015 temperatures reached 102 degrees on June 8th, and in 2021 we saw a high temperate of 118 degrees in the month of June. My weather app is calling for highs in the 70s and low 80s for the rest of this month. There will also be a few more rounds of rain coming our way.

The greens are rolling true! Not only have our greens improved in their health and speed but their uniformity is better than I ever imagined. This is due in part to the mowing patterns and our chemical regiment. Our greens are a mix of creeping bentgrass and annual bluegrass (*Poa Annua*). These are very different species from one another but when used together they complement each other's strengths and weaknesses. The weather so far this season has been great for both species and we have taken full advantage.

Thank you and enjoy the course!
